

APPENDIX A

POLICY DOCUMENT GLOSSARY

Acres, Gross - The entire acreage of a site. Typically calculated to the centerline of proposed bounding streets and to the edge of the right-of-way of existing or dedicated streets.

Acres, Net - The portion of a site that can actually be built upon. The following generally are not included in the net acreage of a site: public or private road rights-of-way, public open space, and flood ways.

Annex, v. - To incorporate a land area into an existing district or municipality, with a resulting change in the boundaries of the annexing jurisdiction.

Aquaculture - The culture and husbandry of aquatic organisms, including, but not limited to: fish, shellfish, mollusks, crustaceans, kelp, and algae. Aquaculture shall not mean the culture and husbandry of commercially utilized inland crops, including, but not limited to: rice, watercress, and beansprouts.

Archaeological - Relating to the material remains of past human life, culture, or activities.

Bicycle Lane (Class II facility) - A corridor expressly reserved for bicycles, existing on a street or roadway in addition to any lanes for use by motorized vehicles.

Bicycle Path (Class I facility) - A paved route not on a street or roadway and expressly reserved for bicycles traversing an otherwise unpaved area. Bicycle paths may parallel roads but typically are separated from them by landscaping.

Bicycle Route (Class III facility) - A facility shared with motorists and identified only by signs, a bicycle route has no pavement markings or lane stripes.

Biological Productivity - Biological productivity generally refers to the amount of organic material produced per unit time.

Boundary of a Wetland - (1) The boundary between land with predominantly hydrophytic cover and land with predominantly mesophytic or xerophytic cover; (2) the boundary between soil that is predominantly hydric and soil that is predominantly nonhydric; or (3) in the case of wetlands without vegetation or soils, the boundary between land that is flooded or saturated at some time during years of normal precipitation and land that is not. Areas with drained hydric soils that are no longer capable of supporting hydrophytes are not considered wetlands.

Building - Any structure used or intended for supporting or sheltering any use or occupancy.

California Environmental Quality Act (CEQA) - A State law requiring State and local agencies to regulate activities with consideration for environmental protection. If a proposed activity has the potential for a significant adverse environmental impact, an environmental impact report (EIR) must be prepared and certified as to its adequacy before taking action on the proposed project.

Caltrans - California Department of Transportation.

City - City with a capital "C" generally refers to the City of Eureka government or administration. City with a lower case "c" generally refers to the geographical area of the city, both incorporated and unincorporated territory (*e.g.*, the city bikeway system).

Coastal-Dependent Development or Use - Any development or use which requires a site on, or adjacent to, the sea to be able to function at all.

Coastal-Related Development - Any use that is dependent on a coastal-dependent development or use.

Collector - Relatively-low-speed, street that provides circulation within and between neighborhoods. Collectors usually serve short trips and are intended for collecting trips from local streets and distributing them to the arterial network.

Commercial Recreational Facilities - Facilities serving recreational needs but operated for private profit (*e.g.*, riding stable, chartered fishing boats, tourist attractions, and amusement or marine parks).

Community Noise Equivalent Level (CNEL) - A 24-hour energy equivalent level derived from a variety of single-noise events, with weighting factors of 5 and 10 dBA applied to the evening (7 PM to 10 PM) and nighttime (10 PM to 7 AM) periods, respectively, to allow for the greater sensitivity to noise during these hours.

Compatible - Capable of existing together without conflict or ill effects.

Conservation - The management of natural resources to prevent waste, destruction, or neglect.

Consistent - Free from variation or contradiction. Programs in the General Plan are to be consistent, not contradictory or preferential. State law requires consistency between a general plan and implementation measures such as the zoning ordinance.

County - County with a capital "C" generally refers to the government or administration of a county, in the case of the Eureka General Plan, Humboldt County. County with a lower case "c" generally refers to the geographical area of the county (*e.g.*, the unincorporated county).

Critical Facility - Facilities housing or serving many people, which are necessary in the event of an earthquake or flood, such as hospitals, fire, police, and emergency service facilities, utility "lifeline" facilities, such as water, electricity, and gas supply, sewage disposal, and communications and transportation facilities.

dB - Decibel; a unit used to express the relative intensity of a sound as it is heard by the human ear.

dBA - The "A-weighted" scale for measuring sound in decibels; weighs or reduces the effects of low and high frequencies in order to simulate human hearing. Every increase of 10 dBA doubles the perceived loudness though the noise is actually ten times more intense.

Density, Residential - The number of permanent residential dwelling units per "net" acre of land.

Developable Acres, Net - The portion of a site that can be used for density calculations. For instance, public or private road rights-of-way are not included in the net developable acreage of a site.

Developable Land - Land that is suitable as a location for structures and that can be developed free of hazards to, and without disruption of, or significant impact on, natural resource areas.

Amended by Council
Resolution 2008-08.
(amended section on next page)

A definition of the term “commercial uses incidental to the primary coastal dependent industrial use” is appended, by Council Resolution 2008-08, adopted March 4, 2008, in alphabetical order, to Appendix A – *Policy Document Glossary* of the LUP (*City of Eureka General Plan – Policy Document*) to read as follows:

Commercial Uses Incidental to the Primary Coastal Dependent

Industrial Use – Those certain commercial uses allowed within the Core Coastal-Dependent Industrial Area which are minor in significance, and subordinate and directly related to the primary coastal-dependent industrial uses for which the area is designated. Commercial uses incidental to the primary coastal dependent use include, but are not limited to, retail sales and services of goods produced or functional work provided at the site, such as fish markets or seafood restaurants at commercial fish processing facilities, and facility tour areas.

Developed - Developed with a structure that is a principal or conditional use permitted under a parcel's land use designation.

Development - On land, in or under water, the placement or erection of any solid material or structure; discharge or disposal of any dredged material or of any gaseous, liquid, solid, or thermal waste; grading, removing, dredging, mining or extraction of any materials; change in the density or intensity of use of land, including, but not limited to, subdivision pursuant to the Subdivision Map Act (commencing with Section 66410 of the Government Code), and any other division of land, including lot splits, except where the land division is brought about in connection with the purchase of such land by a public agency for public recreational use; change in the intensity of use of water, or of access thereto; construction, reconstruction, demolition, or alteration of the size of any structure, including any facility of any private, public, or municipal utility; and the removal or harvesting of major vegetation other than for agricultural purposes, kelp harvesting, and timber operations which are in accordance with a timber harvesting plan submitted pursuant to the provisions of the Z'berg-Nejedly Forest Practices Act of 1973 (commencing with Public Resources Code Section 4511).

Dikes - A bank constructed to control or confine tidal waters.

Duplex - A detached building under single ownership that is designed for occupation as the residence of two families living independently of each other.

Dwelling Unit - A room or group of rooms (including sleeping, eating, cooking, and sanitation facilities, but not more than one kitchen), that constitutes an independent housekeeping unit, occupied or intended for occupancy by one household on a long-term basis.

Encourage, v. - To stimulate or foster a particular condition through direct or indirect action by the private sector or government agencies.

Endangered Species - A species of animal or plant is considered to be endangered when its prospects for survival and reproduction are in immediate jeopardy from one or more causes.

Energy Facility - Any public or private processing, producing, generating, storing, transmitting, or recovering facility for electricity, natural gas, petroleum, coal, or other source of energy.

Enhance, v. - To improve existing conditions by increasing the quantity or quality of beneficial uses or features.

Environmental Impact Report (EIR) - A report that assesses all the environmental characteristics of an area and determines what effects or impacts will result if the area is altered or disturbed by a proposed action.

Environmentally Sensitive Habitat Areas - Any area in which plant or animal life, or their habitats, are either rare or especially valuable because of their special nature or role in an ecosystem and which could be easily disturbed or degraded by human activities and developments.

Estuary - A coastal water body usually semi-enclosed by land, but which has open, partially obstructed, or intermittent exchange with the ocean and in which ocean water is at least occasionally diluted by fresh water runoff from the land.

Expressway - A divided multi-lane major arterial street for through traffic with partial control of access and with grade separations at major intersections.

 **Farmed Wetlands** - Diked, former tidal marshes and clearly defined non-tidal sloughs which have been mechanically or physically altered for the production of food or fiber, but which would revert to typical wetland habitat if farming and related dike and drainage maintenance were discontinued. In their present state, these lands are frequently covered by shallow water during the rainy season. Their vegetation is characterized by a higher percentage of sedges, rush, and other hydrophytes than is common in upland agricultural areas. In estuarine areas such as Humboldt Bay, the boundary between uplands and wetlands is generally between +8 and +11 feet above mean lower low water (MLLW).

Fault - A fracture in the earth's crust forming a boundary between rock masses that have shifted.

 **Feasible** - Capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, and technological factors.

 **Fill** - Earth or other substance of material, including piling, placed for the purpose of erecting structures thereon.

Flood, 100-Year - The magnitude of a flood expected to occur on the average every 100 years, based on historical data. The 100-year flood has a 1/100, or one percent, chance of occurring in any given year.

 **Flood Hazard Areas** - Those areas subject to inundation by a 100-year flood.

Flood Insurance Rate Map (FIRM) - For each community, the official map on which the Federal Insurance Administration has delineated areas of special flood hazard and the risk premium zones applicable to that community.

Floor Area Ratio (FAR) - The gross floor area permitted on a site divided by the total net area of the site, expressed in decimals to two places. For example, on a site with 10,000 net sq. ft. of land area, a Floor Area Ratio of 1.00 will allow a maximum of 10,000 gross sq. ft. of building floor area to be built. On the same site, an FAR of 1.50 would allow 15,000 sq. ft. of floor area; an FAR of 2.00 would allow 20,000 sq. ft.; and an FAR of 0.50 would allow only 5,000 sq. ft.

Freeway - A high-speed, high-capacity, limited-access transportation facility serving regional and countywide travel. Freeways generally are used for long trips between major land use generators.

 **Functional Capacity** - The ability of a particular eco-system to be self-sustaining and to maintain natural species' diversity.

Geological - Pertaining to rock or solid matter.

Geologic Hazards - Include the following:

- 
1. Seismic hazard areas delineated on fault maps as subject to potential surface rupture, on soil maps indicating materials particularly prone to shaking or liquefaction, and in local and regional seismic safety plans;
 2. Tsunami runup areas identified on U.S. Army Corps of Engineers 100-year recurrence maps, by other scientific or historic studies, and other known areas of tsunami risk;

3. Landslide hazard areas delineated on slope stability maps and in local and regional geologic or safety plans;
4. Beach areas subject to erosion; and,
5. Other geologic hazards such as expansive soils and subsidence areas.

Goal -The ultimate purpose of an effort stated in a way that is general in nature and immeasurable.

Gulch Greenway - A natural drainage channel generally with slopes of 30 percent or greater and including the level areas below the slopes typically containing lush vegetation and wildlife habitat.

Hazardous Material - Any substance that, because of its quantity, concentration, or physical or chemical characteristics, poses a significant present or potential hazard to human health and safety or to the environment if released into the workplace or the environment. The term includes, but is not limited to, hazardous substances and hazardous wastes.

Healthy Populations - The phrases "... healthy populations of all species of marine organisms ..." and "... optimum populations of marine organisms ..." refer generally to the maintenance of natural species diversity, abundance, and composition.

Household - All those persons--related or unrelated--who occupy a single housing unit.

Housing Unit - The place of permanent or customary abode of a person or family. A housing unit may be a single-family dwelling, a multi-family dwelling, a condominium, a modular home, a mobile home, a cooperative, or any other residential unit considered real property under State law. A housing unit has, at least, cooking facilities, a bathroom, and a place to sleep. It also is a dwelling that cannot be moved without substantial damage or unreasonable cost.

Hydric Soils - Soils that for a significant period of the growing season have reducing conditions in the major part of the root zone and are saturated within 25 cm of the surface. Most hydric soils have properties that reflect dominant wetness characteristics, namely, they have immediately below 25 cm dominant colors in the matrix as follows:

1. If there is mottling, the chroma is 2 or less.
2. If there is no mottling, the chroma is 1 or less

Hydrophytic Plant - Any plant growing in water or on a substrate that is at least periodically deficient in oxygen as a result of excessive water content (i.e., plants typically found in wet habitats).

Implementation Program - An action, procedures, program, or technique that carries out general plan policy. Implementation programs also specify primary responsibility for carrying out the action and a time frame for its accomplishment.

Infill Development - Development of vacant land (usually individual lots or left-over properties) within areas that are already largely developed.

Infrastructure - Public services and facilities, such as sewage-disposal systems, water-supply systems, other utility systems, and roads.

Incidental Public Service Purposes - Projects, such as burying cables and pipes, inspection of piers, etc., which may temporarily impact the resources of a habitat area.

Lateral Access - A recorded dedication or easement granting to the public the right to pass and repass over dedicatory's real property generally parallel to, and up to 25 feet inland from, the mean high tide line

or to the base of a bluff, but in no case allowing the public the right to pass nearer than five feet to any living unit on the property. Lateral accessways should be used for public pass and repass and passive recreational use, unless specified otherwise.

L_{dn} - Day-Night Average Sound Level. The A-weighted average sound level for a given area (measured in decibels) during a 24-hour period with a 10 dB weighting applied to night-time sound levels. The L_{dn} is approximately numerically equal to the CNEL for most environmental settings.

L_{eq} - The energy equivalent level, defined as the average sound level on the basis of sound energy (or sound pressure squared). The L_{eq} is a "dosage" type measure and is the basis for the descriptors used in current standards, such as the 24-hour CNEL used by the State of California.

Levee - A bank constructed to control or confine flood waters.

Level of Service (LOS) - A scale that measures the amount of traffic a roadway may be capable of handling on a roadway or at the intersection of roadways. Levels range from A to F, with A representing the highest level of service.

Liquefaction - The transformation of loose water-saturated granular materials (such as sand or silt) from a solid into a liquid state. A type of ground failure that can occur during an earthquake.

Local Agency Formation Commission (LAFCo) - The countywide commission that reviews and evaluates all proposals for formation of special districts, incorporation of cities, annexation to special districts or cities, consolidation of districts, and merger of districts with cities. LAFCo is empowered to approve, disapprove, or conditionally approve such proposals.

L₁₀ - A statistical descriptor indicating peak noise levels—the sound level exceeded ten percent of the time. It is a commonly used descriptor of community noise, and has been used in Federal Highway Administration standards and the standards of some cities and counties.

Major Energy or Public Works Facility - Any public works project or energy facility that exceeds \$100,000 in estimated cost of construction.

Marsh - Any area designated as marsh or swamp on the largest scale United States Geologic Survey topographic map most recently published. A marsh usually is an area periodically or permanently covered with shallow water, either fresh or saline.

Mesophytic Plant - Any plant growing where moisture and aeration conditions lie between extremes (i.e., plants typically found in habitats with average moisture conditions, not usually dry or wet).

Minimize, v. - To reduce or lessen, but not necessarily to eliminate.

Mitigate, v. - To ameliorate, alleviate, or avoid to the extent reasonably feasible.

Mixed-use - Properties on which various uses, such as office, commercial, institutional, and residential, are combined in a single building or on a single site in an integrated development project with significant functional interrelationships and a coherent physical design. A "single site" may include contiguous properties.

Multiple Family Building - A detached building designed and used exclusively as a dwelling by three or more families occupying separate suites.

Neighborhood Park - City- or County-owned land intended to serve the recreation needs of people living or working within one-half mile radius of the park.

Noise - Any sound that is undesirable because it interferes with speech and hearing, or is intense enough to damage hearing, or is otherwise annoying. Noise, simply, is "unwanted sound."

Noise Attenuation - Reduction of the level of a noise source using a substance, material, or surface, such as earth berms and/or solid concrete walls.

Noise Contour - A line connecting points of equal noise level as measured on the same scale. Noise levels greater than the 60 Ldn contour (measured in dBA) require noise attenuation in residential development.

Non-Prime Agricultural Land - Coastal agricultural lands that are now in use for crops or grazing, or that are suitable for agriculture, but are not prime-agricultural lands.

Open Space Land - Any parcel or area of land or water that is essentially unimproved and devoted to an open space use for the purposes of (1) the preservation of natural resources, (2) the managed production of resources, (3) outdoor recreation, or (4) public health and safety.

Optimum Populations - See "Healthy Populations."

Parcel - A lot, or contiguous group of lots, in single ownership or under single control, usually considered a unit for purposes of development.

Peak Hour/Peak Period - For any given roadway, a daily period during which traffic volume is highest, usually occurring in the morning and evening commute periods.

Person - Any individual, organization, partnership, or other business association or corporation, including any utility, and any federal, state, local government, or special district or an agency thereof.

Planning Area - The Planning Area is the land area addressed by the General Plan.

Policy - A specific statement in text or diagram guiding action and implying clear commitment.

Prime Agricultural Land -

1. All land which qualifies for rating as Class I or Class II in the Soil Conservation Service land use capability classifications.
2. Land which qualifies for rating 80 through 100 in the Storie Index Rating.
3. Land which supports livestock used for the production of food and fiber and which has an annual carrying capacity equivalent to at least one animal unit per acre as defined by USDA.
4. Land planted with fruit or nut bearing trees, vines, bushes, or crops which have a non-bearing period of less than five years and which will normally return during the commercial bearing period of an annual basis from the production of unprocessed agricultural plant production not less than \$200 per acre.

Public and Quasi-Public Facilities - Institutional, academic, governmental and community service uses, either publicly owned or operated by non-profit organizations.

Public Works -

-  1. All production, storage, transmission, and recovery facilities for water, sewerage, telephone, and other similar utilities owned or operated by any public agency or by any utility subject to the jurisdiction of the Public Utilities Commission except for energy facilities.
- 2. All public transportation facilities, including streets, roads, highways, public parking lots and structures, ports, harbors, airports, railroads, and mass transit facilities and stations, bridges, trolley wires, and other related facilities.
- 3. All publicly financed recreational facilities and any development by a special district.
- 4. All community college facilities.

Quantified Objective (Housing only) - The number of housing units that the City expects to be constructed and the number of households the City expects will be assisted through Housing Element programs and based on general market conditions during the time frame of the Housing Element.

Rare or Endangered Species - A species of animal or plant listed in: Sections 670.2 or 670.5, Title 14, California Administrative Code; or Title 50, Code of Federal Regulations, Section 17.11 or Section 17.2, pursuant to the Federal Endangered Species Act designating species as rare, threatened, or endangered.

Reclamation - The reuse of resources, usually those present in solid wastes or sewage.

Reducing Conditions - The soil solution is virtually free of dissolved oxygen. A soil is considered saturated at the depth at which water stands in an unlined borehole or when all pores are filled with water.

 Soils temporarily saturated as a result of controlled flooding or irrigation are excluded from hydric soils.

Residential, Multiple Family - Usually three or more dwelling units on a single site, which may be in the same or separate buildings.

Residential, Single-family - A single dwelling unit on a building site.

Right-of-way - A strip of land occupied or intended to be occupied by certain transportation and public use facilities, such as roadways, railroads, and utility lines.

Riparian Vegetation - Vegetation commonly occurring adjacent to stream banks and gulches and includes

 such plants as willows, alders, cottonwood, wax myrtle, big leaf maple, California laurel, red elderberry, etc.

River or Stream - A natural watercourse as designated by a solid line or dash and three dots symbol shown

 on the United States Geological Survey map most recently published, or any well-defined channel with distinguishable bed and bank that shows evidence of having contained flowing water as indicated by scourer deposit of rock, sand gravel, soil, or debris.

Scenic Coastal Areas -

-  1. Open areas of particular value in preserving natural landforms and significant vegetation, or in providing attractive transitions between natural and urbanized areas.
- 2. Other scenic areas and historical districts designated by cities and counties.

Scenic Vista Point - An area designated, signed, and accessible to the public for purposes of viewing and

 sightseeing.

Sea - The Pacific Ocean and all harbors, bays, channels, estuaries, salt marshes, sloughs, and other areas  subject to tidal action through any connection with the Pacific Ocean, excluding non-estuarine rivers, streams, tributaries, creeks, and flood control and drainage channels.

Second Unit - A Self-contained living unit, either attached to or detached from, and in addition to, the primary residential unit on a single lot. Sometimes called "Granny Flat."

Seismic - Caused by or subject to earthquakes or earth vibrations.

On-site Sewage Treatment and Disposal Systems - A sewage-treatment system that includes a settling tank through which liquid sewage flows and in which solid sewage settles and is decomposed by bacteria in the absence of oxygen. On-site (septic) systems are often used for individual-home waste disposal where an urban sewer system is not available.

Shall - That which is obligatory or necessary.

Should - Signifies a directive to be honored if at all feasible.

Single-family Dwelling, Attached - A dwelling unit occupied or intended for occupancy by only one household that is structurally connected with at least one other such dwelling unit.

Single-family Dwelling, Detached - A dwelling unit occupied or intended for occupancy by only one household that is structurally independent from any other such dwelling unit or structure intended for residential or other use.

Site - A parcel of land used or intended for one use or a group of uses and having frontage on a public or an approved private street. A lot.

Slope - Land gradient described as the vertical rise divided by the horizontal run, and expressed in percent.

Soil - The unconsolidated material on the immediate surface of the earth created by natural forces that serves as natural medium for growing land plants.

Solid Waste - Any unwanted or discarded material that is not a liquid or gas. Includes organic wastes, paper products, metals, glass, plastics, cloth, brick, rock, soil, leather, rubber, yard wastes, and wood, but does not include sewage and hazardous materials.

Special District - Any public agency other than a local government formed pursuant to general law or  special act for the local performance of governmental or proprietary functions within limited boundaries. "Special District" includes, but is not limited to, a county service area, a maintenance district or area, an improvement district or improvement zone, or any other zone or area, formed for the purpose of designating an area within which a property tax rate will be levied to pay for a service or improvement benefitting that area.

Sphere of Influence - The probable ultimate physical boundaries and service area of a local agency (City or district) as determined by the Local Agency Formation Commission (LAFCo) of the County.

Standard - A specific, often quantified guideline, incorporated in a policy or implementation program, defining the relationship between two or more variables. Standards can often translate directly into regulatory controls.

Stream Transition Line - That line closest to a stream where riparian vegetation is permanently established.

Streets, Local - Local streets not shown on the Circulation Plan, Map, or Diagram, whose primary intended purpose is to provide access to fronting properties.

Structure - Includes, but is not limited to, any building, road, pipe, flume, conduit, siphon, aqueduct,  telephone line, and electrical power transmission and distribution line.

Subdivision - The division of a tract of land into defined lots, either improved or unimproved, which can be separately conveyed by sale or lease, and which can be altered or developed.

Subsidence - The gradual settling or sinking of an area with little or no horizontal motion.

Support Facilities - Those facilities that provide ease of public use and maintenance of coastal accessways.  Such facilities include signs, lighting, benches, trash receptacles, public telephones, restrooms, showers, bike security racks, public transit loading and unloading areas, parking areas, trail improvements, and fencing.

Tsunami - A large ocean wave generated by an earthquake in or near the ocean.

Undevelopable - Specific areas where topographic, geologic, and/or surficial soil conditions indicate a significant danger to future occupants and a liability to the City are designated as "undevelopable" by the City.

Use - The purpose for which a lot or structure is or may be leased, occupied, maintained, arranged, designed, intended, constructed, erected, moved, altered, and/or enlarged in accordance with the Zoning Ordinance and General Plan land use designations.

Vacant - Lands or buildings that are not actively used for any purpose.

Vertical Access - A recorded dedication or easement granting to the public the privilege and right to pass and repass over dedicatory's real property from a public road to the mean high tide line. Vertical accessways should be used for pass and repass and passive recreational use, unless specified otherwise. 

View Corridor - The line of sight—identified as to height, width, and distance—of an observer looking toward an object of significance to the community (e.g., ridgeline, river, historic building, etc.); the route that directs the viewers attention.

Viewshed - The area within view from a defined observation point.

Visitor-Serving Facilities - Public or private developments that provide accommodations, food and services,  including hotels, motels, campgrounds, restaurants, and commercial-recreation developments such as shopping, eating, and amusement areas for tourists.

Watercourse - Natural or once natural flowing (perennially or intermittently) water including rivers, streams, and creeks. Includes natural waterways that have been channelized, but does not include manmade channels, ditches, and underground drainage and sewage systems.

Watersheds - Regions or areas drained by a network of surface or subsurface watercourses and have the potential for impacts on coastal streams, wetlands, estuaries, and groundwater basins through runoff and percolation.

Wetland - Lands within the coastal zone which may be covered periodically or permanently with shallow water and include saltwater marshes, freshwater marshes, open or closed brackish water marshes, swamps, mudflats, and fens.

Zoning - The division of a city or county by legislative regulations into areas, or zones, which specify allowable uses for real property and size restrictions for buildings within these areas; a program that implements policies of the General Plan.
